### Epsom's Street Trees need your help through the Summer

For the last few years, a special arrangement between Surrey County Council (SCC) and Epsom & Ewell Borough Council (EEBC) has enabled the Epsom Tree Advisory Board (TAB) to plant trees in the verges around the Borough to replace those that have died, become dangerous or been vandalised or knocked down by cars. In 2016/17 more than 250 trees were planted throughout the Borough.

Due to budget cuts, SCC and EEBC have now stopped all expenditure on tree replacement and are making no effort to ensure that the young trees don't die for want of water during the summer. So your help is needed!

Young trees are especially vulnerable to drought conditions until their root systems have got deep enough – so if there is a new tree near where you live, please give it a bucket of water if it looks droopy or when we have had no rain for more than a week. A full list of their locations is available [here](#). Please help to save our trees during the summer heat – assuming we get some!

Attempts are being made for new arrangements with SCC, EEBC and the TAB so that tree replacement can continue, in which case one or more Tree Funds will be established to ensure that Epsom's streets can remain green and leafy places, thus improving our town's visual appearance, quality of air and impact of emissions pollution.

But the immediate need is to save the ones already planted – please help and encourage your neighbours and friends to help too.
